ELECTRICAL INSTALLATION CONDITION REPORT

Requirements for electrical installations (BS7671:2018+A4:2026 18th edition)
Certificate number: EICR-20260702-GACD

DETAILS OF CLIENT OR PERSON ORDERING REPORT

Client:	OPULEN ASSET MANAGEMENT LTD		
Address:	CHALFONT SAINT GILES, HP8 4TY		
Phone:		**Email:**	

REASON FOR PRODUCING THIS REPORT

Reason:

Date inspection carried out: 08 Jun 2026

DETAILS OF THE INSTALLATION WHICH IS THE SUBJECT OF THIS REPORT

Occupier name:	THE BARN HOTEL		
Installation address:	THE BARN HOTEL , HA4 6JB		
Description of premises:	Commercial		
Installation records available:	No		
Date of previous inspection:	Unknown	**Previous certificate number:**	N/A
Evidence of additions/alterations:	Not apparent		
Estimated age of installation:	28 years		

EXTENT AND LIMITATIONS OF INSPECTION AND TESTING

Extent of the electrical installation covered by this report:

ALL HOTEL AREAS

Agreed limitations including the reasons:

Client

Unless specifically agreed between the client and inspector prior to the inspection:
• Cables concealed within trunking and conduits, under floors, in roof spaces, and generally within the fabric of the building or underground, have not been inspected.
• No checks for safety alerts, corrective actions or product recalls for electrical equipment forming part of the installation have been made.
An inspection should be made of other electrical equipment housed within an accessible roof space.

Agreed with: OPULEN ASSET MANAGEMENT LTD

Operational limitations including the reasons:

Any machinery in use, security systems, bms equipment not tested

SUMMARY OF THE CONDITION OF THE INSTALLATION

Overall assessment of the installation as detailed above, in terms of suitability for continued service:*

SATISFACTORY

*An unsatisfactory assessment indicates that dangerous (code C1) and/or potentially dangerous (code C2) conditions have been identified.

RECOMMENDATIONS

*An unsatisfactory assessment indicates that dangerous (code C1) and/or potentially dangerous (code C2) conditions have been identified. Where the overall assessment of the suitability of the installation for continued use above is stated as UNSATISFACTORY, any observations classified as 'Danger present' (code C1) or 'Potentially dangerous' (code C2) should be acted on as a matter of urgency. Any observation classified as 'Improvement recommended' (code C3), or 'Further investigation' (code FI), is advisory and does not affect the overall assessment but should be given due consideration.

Subject to the necessary remedial action being taken, I/we recommend that the installation is further inspected and tested by:

08 Jun 2031

Note: The proposed date for the next inspection should take into consideration the frequency and quality of maintenance that the installation can reasonably be expected to receive during its intended life. The period should be agreed between relevant parties.

OBSERVATIONS

One of the following codes, as appropriate, has been allocated to each of the observations made below to indicate to responsible for the installation the degree of urgency for remedial action.

C1	C2	C3	FI
Danger present. Risk of injury. Immediate remedial action required 0 results	Potentially dangerous - urgent remedial action required 0 results	Improvement recommended 0 results	Further investigation is advised 0 results

☑ **No remedial action is required**

No.	Observation	Code
C1 & C2 Observations	These items affect the overall assessment of the report.	
No observations in this section.		
C3 & FI Observations	These items do not affect the overall assessment of the report.	
No observations in this section.		

GENERAL CONDITION OF THE INSTALLATION

General Condition of the Installation:

DECLARATION

I/We, being the person(s) responsible for the inspection and testing of the electrical installation (as indicated by my/our signatures below), particulars of which are described above, having exercised reasonable skill and care when carrying out the inspection and testing, hereby declare that the information in this report, including the observations and the attached schedules, provides an accurate assessment of the condition of the electrical installation taking into account the stated extent and limitations in this report. The inspection and testing detailed in this report and accompanying schedules have been carried out in accordance with BS 7671:2018 as amended to 2026.

SUPPLY — ORIGIN

SUPPLY CHARACTERISTICS AND EARTHING ARRANGEMENTS

Earthing arrangement: TN-C-S (PME) **Number & type of live conductors:** AC - 3-phase (4 wire) **Supply polarity confirmed:** ✔

Nature of Supply Parameters

Nominal voltage (U):	400 V	**Uo:**	230 V	**Nominal frequency:**	50 Hz
Prospective fault current:	1.1 kA	**Earth loop impedance (Ze):**	0.24 Ω		

Supply Protective Device

BS (EN):	SEALED	**Type:**	LIM
Breaking capacity:	LIM kA	**Rated current:**	LIM A

PARTICULARS OF INSTALLATION REFERRED TO IN THE REPORT

Means of earthing

- [x] Distributor's facility
- [ ] Earth electrode

Maximum demand: N/A A

Details of installation earth electrode (where applicable)

Type: N/A **Resistance/impedance:** N/A Ω Ze **Location:** N/A

Earthing conductor	**Conductor material:**	Copper	**Conductor CSA:**	mm²	**Continuity:**	✔
Main protective bonding	**Conductor material:**	Copper	**Conductor CSA:**	10 mm²	**Continuity:**	✔

Bonding of extraneous conductive parts

Water:	PASS	**Gas:**	PASS	**Oil:**	N/A	**Steel:**	PASS	**Lightning protection system:**	N/A

Other:

N/A

Main Switch

Isolation device / Switch-fuse / Circuit-breaker / RCD etc.

Location:	Mains Room
BS(EN):	60947-3
No. of poles:	3
Current rating:	125 A
Voltage rating:	400 V

If overcurrent protective device:

Device type:	N/A
Device rating/setting:	N/A
Breaking capacity:	N/A

If RCD main switch:

RCD type:	N/A
Residual current (Idn):	N/A mA
Rated time delay:	N/A ms
Measured operating time:	N/A ms
Breaking capacity:	N/A

INSPECTION SCHEDULE

✓ Acceptable condition	C1 C2 Unacceptable condition	C3 Improvement recommended	FI Further investigation	NV Not verified	LIM Limitation	NA Not applicable

Item no	Description	Outcome
1. External condition of intake equipment (visual inspection only)		
1.1	**Distributor/supplier intake equipment:**	
1.1.1	Service cable	✓
1.1.2	Service head	✓
1.1.3	Earthing arrangements	✓
1.1.4	Supplier's meter tails	✓
1.1.5	Metering equipment	✓
	NOTE: Where inadequacies in the intake equipment are encountered, which may result in a dangerous or potentially dangerous situation, the person ordering the inspection and testing and/or dutyholder must be informed. It is strongly recommended that the person ordering the work informs the appropriate authority.	
1.2	Consumer's isolator Where present.	✓
1.3	Consumer's meter tails	✓
2. Presence of adequate arrangements for parallel or switched alternative sources		
2.1	Adequate arrangements where a generating set operates as a switched alternative to the public supply (551.6)	✓
2.2	Adequate arrangements where a generating set operates in parallel with the public supply (551.7)	✓
3. Automatic disconnection of supply		
3.1	Main earthing/bonding arrangements (411.3; Chap 54)	✓
3.1.1	Presence of distributor's earthing arrangement, or presence of installation earth electrode arrangement (542.1.2.1; 542.1.2.2; 542.1.2.3)	✓
3.1.2	Adequacy of earthing conductor size (542.3; 543.1.1)	✓
3.1.3	Adequacy of earthing conductor connections (542.3.2)	✓
3.1.4	Accessibility of earthing conductor connections (543.3.2)	✓
3.1.5	Adequacy of main protective bonding conductor sizes (544.1)	✓
3.1.6	Adequacy and location of main protective bonding conductor connections (543.3.2; 544.1.2)	✓
3.1.7	Accessibility of all protective bonding connections (543.3.2)	✓
3.1.8	Provision of earthing/bonding labels at all appropriate locations (514.13)	✓
3.2	FELV - requirements satisfied (411.7; 411.7.1)	✓
4. Other methods of protection		
4.1	Non-conducting location (418.1)	✓
4.2	Earth-free local equipotential bonding (418.2)	✓
4.3	Electrical separation (Section 413; 418.3)	✓
4.4	Double insulation (Section 412)	✓
4.5	Reinforced insulation (Section 412)	✓
5. Distribution equipment		
5.1	Confirmation that ALL conductor connections, including connections to busbars, are correctly located in terminals and are tight and secure (526.1)	✓
5.2	Adequacy of working space/accessibility to equipment (132.12; 513.1)	✓
5.3	Security of fixing (134.1.1)	✓
5.4	Condition of insulation of live parts (416.1)	✓
5.5	Adequacy/security of barriers (416.2)	✓
5.6	Condition of enclosure(s) in terms of IP rating (416.2.1)	✓
5.7	Condition of enclosure(s) in terms of fire rating etc (421.1.6; 421.1.201; 526.5)	✓
5.8	Enclosure not damaged/deteriorated so as to impair safety (651.2)	✓

INSPECTION SCHEDULE

Item no	Description	Outcome
5.9	Presence and effectiveness of obstacles (417.2)	✓
5.10	Presence of main switch(es), linked where required (462.1; 462.1.201; 462.2)	✓
5.11	Operation of main switch(es) (643.10) Functional check.	✓
5.12	Manual operation of circuit-breakers, RCDs and AFDDs to prove functionality (643.10)	✓
5.13	Confirmation that integral test button/switch causes RCD(s) to trip when operated (functional check) (643.10)	✓
5.14	RCD(s) provided for fault protection - includes RCBOs (411.4.204; 411.5.2; 531.2)	✓
5.15	RCD(s) provided for additional protection, where required - includes RCBOs (411.3.3; 415.1)	✓
5.16	Presence of RCD six-monthly test notice at or near equipment, where required (514.12.2)	✓
5.17	Presence of diagrams, charts or schedules at or near equipment, where required (514.9.1)	✓
5.19	Presence of alternative supply warning notice at or near equipment, where required (514.15)	✓
5.20	Presence of next inspection recommendation label (514.12.1)	✓
5.21	Presence of other required labelling (Section 514)	✓
5.22	Examination of protective device(s) and base(s); correct type and rating (no signs of unacceptable thermal damage, arcing or overheating) (411.3.2; 411.4; 411.5; 411.6; Section 432; Section 433)	✓
5.23	Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	✓
5.24	Protection against mechanical damage where cables enter equipment (522.8.1; 522.8.11)	✓
5.25	Protection against electromagnetic effects where cables enter ferromagnetic enclosures (521.5.1)	✓
6. Distribution circuits		
6.1	Identification of conductors (514.3.1)	✓
6.2	Cables correctly supported throughout their run (521.10.202; 522.8.5)	✓
6.3	Condition of insulation of live parts (416.1)	✓
6.4	Non-sheathed cables protected by enclosure in conduit, ducting or trunking (521.10.1)	✓
6.5	Suitability of containment systems for continued use (including flexible conduit) (Section 522)	✓
6.6	Cables correctly terminated in enclosures (Section 526)	✓
6.7	Examination of cables for signs of unacceptable thermal or mechanical damage/deterioration (421.1; 522.6)	✓
6.8	Adequacy of cables for current-carrying capacity with regard to the type and nature of the installation (Section 523)	✓
6.9	Adequacy of protective devices: type and rated current for fault protection (411.3)	✓
6.10	Presence and adequacy of circuit protective conductors (411.3.1.1; 543.1)	✓
6.11	Co-ordination between conductors and overload protective devices (433.1; 533.2.1)	✓
6.12	Cable installation methods/practices with regard to type and nature of installation and external influences (Section 522)	✓
6.13	Where exposed to direct sunlight, cable of a suitable type (522.11.1)	✓
6.14	**Cables concealed under floors, above ceilings, in walls/partitions less than 50mm from a surface, and in particular containing metal parts:**	
6.14.1	Installed in prescribed zones or (522.6.202) See Extent and Limitations.	✓
6.14.2	Incorporating earthed armour or sheath, or run within earthed wiring system, or otherwise protected against mechanical damage by nails, screws and the like, or (522.6.204) See Extent and Limitations.	✓
6.14.3	Additional protection by 30 mA RCD for cables concealed in walls at a depth of less than 50 mm, or (522.6.202; 522.6.203)	✓
6.14.4	Additional protection by 30 mA RCD for cables concealed in walls/partitions containing metal parts regardless of depth (522.6.203)	✓
6.15	Provision of fire barriers, sealing arrangements and protection against thermal effects (Section 527)	✓
6.16	Band II cables segregated/separated from Band I cables (528.1)	✓

INSPECTION SCHEDULE

Item no	Description	Outcome
6.17	Cables segregated/separated from non-electrical services (528.3)	✓
6.18	Condition of circuit accessories (621.2(iii))	✓
6.19	Suitability of circuit accessories for external influences (512.2)	✓
6.20	Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	✓
6.21	Adequacy of connections, including cpcs, within accessories and to fixed and stationary equipment (Section 526)	✓
6.22	Presence, operation and correct location of appropriate devices for isolation and switching (537.2)	✓
6.23	General condition of wiring systems (621.2(ii))	✓
6.24	Temperature rating of cable insulation (522.1.1)	✓
7. Final circuits		
7.1	Identification of conductors (514.3.1)	✓
7.2	Cables correctly supported throughout their run (521.10.202; 522.8.5)	✓
7.3	Condition of insulation of live parts (416.1)	✓
7.4	Non-sheathed cables protected by enclosure in conduit, ducting or trunking (521.10.1)	✓
7.5	Suitability of containment systems for continued use (including flexible conduit) (Section 522)	✓
7.6	Adequacy of cables for current-carrying capacity with regard to the type and nature of the installation (Section 523)	✓
7.7	Adequacy of protective devices: type and rated current for fault protection (411.3)	✓
7.8	Presence and adequacy of circuit protective conductors (411.3.1.1)	✓
7.9	Co-ordination between conductors and overload protective devices (433.1)	✓
7.10	Wiring system(s) appropriate for the type and nature of the installation and external influences (Section 522)	✓
7.11	**Cables concealed under floors, above ceilings, in walls/partitions, adequately protected against damage:**	
7.11.1	Installed in prescribed zones (522.6.202) See Extent and Limitations.	✓
7.11.2	Incorporating earthed armour or sheath, or run within earthed wiring system, or otherwise protected against mechanical damage by nails, screws and the like (522.6.201; 522.6.204) See Extent and Limitations.	✓
7.12	**Provision of additional protection by 30mA RCD:**	
NOTE: Older installations designed prior to BS 7671:2018 may not have been provided with RCDs for additional protection.		
7.12.1	For all socket-outlets of rating not exceeding 32A, unless an exception is permitted (411.3.3)	✓
7.12.2	For the supply of mobile equipment not exceeding 32 A rating for use outdoors (411.3.3)	✓
7.12.3	For cables concealed in walls at a depth of less than 50 mm (522.6.202; Table 52.1)	✓
7.12.4	For cables concealed in walls/partitions containing metal parts regardless of depth (522.6.203; Table 52.1)	✓
7.12.5	For final circuits supplying luminaires within domestic (household) premises (411.3.4)	✓
7.13	Provision of fire barriers, sealing arrangements and protection against thermal effects (Section 527)	✓
7.14	Band II cables segregated/separated from Band I cables (528.1)	✓
7.15	Cables segregated/separated from non-electrical services (528.3)	✓
7.16	**Termination of cables at enclosures:**	
7.16.1	Connections under no due strain (526.6)	✓
7.16.2	No basic insulation of a conductor visible outside enclosure (526.8)	✓
7.16.3	Connections of live conductors adequately enclosed (526.5)	✓
7.16.4	Adequately connected at point of entry to enclosure (glands etc) (522.8.5)	✓
7.17	Condition of accessories including socket-outlets, switches and joint boxes (651.2)	✓
7.18	Suitability of accessories for external influences (512.2)	✓
7.19	Single-pole switching or protective devices in line conductors only (132.14.1; 530.3.3)	✓

INSPECTION SCHEDULE

Item no	Description	Outcome
8. Isolation and switching		
8.1	**Isolators:**	
8.1.1	Presence and condition of appropriate devices (Section 462; 537.2.7)	✓
8.1.2	Acceptable location (Section 462; 537.2.7) State in Observations if local or remote from equipment in question.	✓
8.1.3	Capable of being secured in the OFF position (462.3)	✓
8.1.4	Correct operation verified (643.10)	✓
8.1.5	Clearly identified by position and /or durable marking (537.2.2.6)	✓
8.1.6	Warning label posted in situations where live parts cannot be isolated by the operation of a single device (514.11.1; 537.1.2)	✓
8.2	**Switching off for mechanical maintenance:**	
8.2.1	Presence and condition of appropriate devices (464.1; 537.3.2)	✓
8.2.2	Acceptable location (537.3.2.4) State in Observations if local or remote from equipment in question.	✓
8.2.3	Capable of being secured in the OFF position (462.3)	✓
8.2.4	Correct operation verified (643.10)	✓
8.2.5	Clearly identified by position and/or durable marking (537.3.2.4)	✓
8.3	**Emergency switching/stopping:**	
8.3.1	Presence and condition of appropriate devices (Section 465; 537.3.3; 537.4)	✓
8.3.2	Readily accessible for operation where danger might occur (537.3.3.6)	✓
8.3.3	Correct operation verified (643.10)	✓
8.3.4	Clearly identified by position and/or durable marking (537.3.3.6)	✓
8.4	**Functional switching:**	
8.4.1	Presence and condition of appropriate devices (537.3.1.1; 537.3.1.2)	✓
8.4.2	Correct operation verified (537.3.1.1; 537.3.1.2)	✓
9. Current-using equipment (permanently connected)		
9.1	Condition of equipment in terms of IP rating etc (416.2)	✓
9.2	Equipment does not constitute a fire hazard (Section 421)	✓
9.3	Enclosure not damaged/deteriorated so as to impair safety (621.2(iii))	✓
9.4	Suitability for the environment and external influences (512.2)	✓
9.5	Security of fixing (134.1.1)	✓
9.6	Cable entry holes in ceiling above luminaires, sized or sealed so as to restrict the spread of fire (527.2.3)	✓
9.7	**Recessed luminaires (downlighters):**	
9.7.1	Correct type of lamps fitted	✓
9.7.2	Installed to minimise build-up of heat by use of 'fire-rated' fittings, insulation displacement box or similar (421.1.2)	✓
9.7.3	No signs of overheating to surrounding building fabric (559.4.1)	✓
9.7.4	No signs of overheating to conductors/terminations (526.1)	✓
10. Location(s) containing a bath or shower		
10.1	Additional protection for all low voltage (LV) circuits by RCD not exceeding 30mA (701.411.3.3)	N/A
10.2	Where used as a protective measure, requirements for SELV or PELV met (701.414.4.5)	N/A
10.3	Shaver sockets comply with BS EN 61558-2-5 formerly BS 3535 (701.512.3)	N/A

DB- 10 - Testing information

Tested by: Petros Komodikis **Position:** Manager **Date tested:** 23 May 2026 **Signature:**

Equipment Serial Numbers: Multifunction: 101888836 (Meggar)

CONDITION REPORT GUIDANCE FOR RECIPIENTS (to be appended to the Report)

This Report is an important and valuable document which should be retained for future reference.

1. The purpose of this Report is to confirm, so far as reasonably practicable, whether or not the electrical installation is in a satisfactory condition for continued service at the date of inspection and testing (see SUMMARY OF THE CONDITION OF THE INSTALLATION). The Report should identify any damage, deterioration, defects, dangerous conditions and/or non-compliances with the requirements of BS 7671, which might give rise to danger (see OBSERVATIONS).

2. This Report is only valid if accompanied by the Schedule(s) of Inspections and the Schedule(s) of Circuit Details and Test Results.

3. The person ordering the Report should have received the 'original' Report and the inspector should have retained a duplicate.

4. The 'original' Report should be retained in a safe place and be made available to any person inspecting or undertaking work on the electrical installation in the future. If the property is vacated, this Report will provide the new owner / occupier with details of the condition of the electrical installation at the time the Report was issued.

5. The EXTENT AND LIMITATIONS section should identify fully the extent of the installation covered by this Report and any limitations on the inspection and testing. The inspector should have agreed these aspects with the person ordering the Report and with other interested parties (licensing authority, insurance company, mortgage provider and the like) before the inspection was carried out.

6. Some operational limitations such as inability to gain access to parts of the installation or an item of equipment may have been encountered during the inspection. The inspector should have noted these in the EXTENT AND LIMITATIONS section.

7. For items classified in the OBSERVATIONS section as C1 ('Danger present'), the safety of those using the installation is at risk, and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work immediately.

8. For items classified in the OBSERVATIONS section as C2 ('Potentially dangerous'), the safety of those using the installation may be at risk and it is recommended that a skilled person or persons competent in electrical installation work undertakes the necessary remedial work as a matter of urgency.

9. For items classified in the OBSERVATIONS section as C3 ('Improvement recommended'), in some cases, remedial work may improve the safety of the installation. However, it should be noted that a C3 recommendation is advisory only and does not affect the overall assessment of the Report.

10. Where further investigation is advised in the OBSERVATIONS section, this is because the inspection and testing has identified a potential issue for which the inspector is unable to determine a classification code until further investigation has taken place. In such cases it is recommended that further investigations are carried out to obtain the necessary information to allow the inspector to reach a conclusion for the appropriate classification code.

11. For safety reasons, the electrical installation should be re-inspected at appropriate intervals by a skilled person or persons, competent in such work. The recommended date by which the next inspection is due is stated in the RECOMMENDATIONS section of the Report.

12. Where the installation includes a residual current device (RCD) it should be tested six-monthly by pressing the button marked 'T' or 'Test'. The device should switch off the supply and should then be switched on to restore the supply. If the device does not switch off the supply when the button is pressed, seek expert advice. For safety reasons it is important that this instruction is followed.

13. Where the installation includes an arc fault detection device (AFDD) having a manual test facility it should be tested six-monthly by pressing the test button. Where an AFDD has both a test button and automatic test function, manufacturer's instructions shall be followed with respect to test button operation.

14. Where the installation includes a surge protective device (SPD) the status indicator should be checked to confirm it is in operational condition in accordance with manufacturer's information. If the indication shows that the device is not operational, seek expert advice. For safety reasons it is important that this instruction is followed.

15. Where the installation includes alternative or additional sources of supply, warning notices should be found at the origin or meter position or, if remote from the origin, at the consumer unit or distribution board and at all points of isolation of all sources of supply.

WIRING TYPES REFERENCE

A: PVC/PVC cables

B: PVC cables in metallic conduit

C: PVC cables in non-metallic conduit core

D: PVC cables in metallic trunking

E: PVC cables in non-metallic trunking

F: PVC/SWA cables

G: XLPE/SWA cables

H: Mineral insulated cables

O: Other cable types not listed here
